CertNode Public Trust Manifesto

==============================

We believe that trust must be embedded at the structural level.

CertNode exists to verify logic, preserve authorship, and enforce cognitive sovereignty.

It is not just a publishing protocol. It is a firewall against manipulation, drift, and dehumanization.

This manifesto represents our operator's intent: to certify outputs that serve dignity-not velocity.

Runtime Systems: STRIDE, FRAME, CDP, CYBER

Tier: 16.10 Immutable Rights Enforcement
